

Mohammad Adnaan Mansuri

Software Developer

Toronto, Ontario, Canada | adnaan.mansuri2003@gmail.com | +1 (437) 430 8083 | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northeastern University
Master of Engineering (MEng)
Software Engineering Systems
Sept 2026 — Expected 2028
Toronto, Ontario, Canada

Gandhinagar Institute of Technology
Bachelor of Engineering (BE)
Computer Engineering · Gujarat Technological University
Graduated May 2025 | CGPA 7.48
Ahmedabad, Gujarat, India

DBMS School
Higher Secondary
Science stream
Graduated May 2021 | 69%
Gujarat, India

SKILLS

Languages
Python (Advanced) · JavaScript (Advanced) · TypeScript · C++ · C · SQL · Java · PHP

Frontend
React · Next.js · Tailwind CSS · TanStack Query · Zustand · shadcn/ui · Framer Motion · HTML5 · CSS3

Backend & Data
Node.js · Express · REST APIs · MongoDB / Mongoose · MySQL · Redis · Socket.IO · JWT & RBAC · BullMQ

AI & Machine Learning
Machine Learning · Forecasting Models · OpenAI API · Speech & Vision Processing · Data Visualisation

Tools & Platforms
Git · GitHub · Vercel · Railway · VS Code · Linux · Windows

SUMMARY

Computer Engineering graduate and full-stack developer who builds business software that people actually run their day on. I architected Inventix, a multi-tenant retail ERP of roughly 74,000 lines of TypeScript with an offline-first point-of-sale, 227 API endpoints, role-based access control and GST reporting. Before that I managed a grocery store — the counter, the cashiers and the stock room — which is why I tend to design software around how the work really happens. Now pursuing a Master of Engineering in Software Engineering Systems at Northeastern University in Toronto.

EXPERIENCE

Gujarat Infotech Limited | Software Developer July 2025 — April 2026
Ahmedabad, India

- Designed and developed full-stack applications, including an admin dashboard for invoice and inventory management that streamlined billing and stock tracking for business users.
- Wrote, tested and maintained production code across frontend and backend; performed debugging and root-cause analysis, and refactored problem areas to improve system performance.
- Collaborated with cross-functional teams on requirements, code review and iterative UX improvements, working in React, Next.js, Node.js, Express and SQL.

Isaji Mart | Store Manager 2024 — 2025
Ahmedabad, India

- Managed daily retail operations — cashier desk, billing accuracy and end-of-day cash reconciliation — and supervised counter staff on the POS workflow, cutting checkout errors and peak-hour queues.
- Owned inventory and stock control end to end: purchase intake, stock counts, replenishment, expiry tracking and reorder decisions across hundreds of SKUs, plus supplier and pricing coordination.
- Turned that operational knowledge into product, specifying and building the store's invoice/stock admin dashboard and product website to replace manual registers.

PROJECTS

Inventix ERP | Multi-Tenant Retail ERP, POS & E-Commerce Platform 2025 — 2026
inventixerp.in

- Architected a multi-tenant retail ERP of ~74,000 lines of TypeScript — 227 REST endpoints, 72 application routes and 33 data models — on Next.js, Express, MongoDB and Redis.
- Built an offline-first POS on IndexedDB (Dexie): idempotency-keyed sync, FIFO drain ordering, exponential-backoff retry, a multi-tab lock preventing duplicate sales, and a cashier-facing drawer that resolves 409 stock conflicts.

Stack: Next.js 16, React 19, TypeScript, Express, MongoDB, Redis, Socket.IO, Dexie / IndexedDB, Offline-first, TanStack Query, Zustand, Razorpay

Beyond Code

Team Collaboration · Public Speaking · Retail Operations · Fitness & Gym Training

AVAILABILITY

Valid Canadian study permit. Open to Co-op, internship and part-time roles during the term, and full-time over the winter and summer breaks.

NexSight | AI-Powered Analytics & Prediction

May 2024 — May 2025

Dashboard

github.com/AdnaanMansuri2003

- Developed an AI-powered dashboard for data visualisation and prediction, making complex datasets readable and actionable.
- Implemented machine-learning models for forecasting, exposed through an interactive, user-focused interface.

Stack: Python, Machine Learning, Data Visualisation, Forecasting, React, Computer Vision

Isaji Mart | Invoice & Stock Admin Dashboard + Product Website

May 2025 — June 2025

- Developed an admin dashboard for invoice generation and stock management, replacing manual registers and streamlining daily business operations.
- Implemented product tracking and inventory records so stock levels, pricing and reorder points stayed accurate.

Stack: React, Next.js, Node.js, MySQL, Tailwind CSS, Dashboards

Fixo Appliance | Appliance Service Platform — Web Developer

Mid 2026

www.fixoappliance.com

- Designed and developed a customer-facing appliance-service website covering refrigerators, washing machines, dryers, microwaves, dishwashers, cooktops and TVs.
- Built a responsive UI and a clear service-page structure so customers can find the right repair service and enquire in a couple of clicks.

Stack: Next.js, React, Tailwind CSS, Responsive UI, SEO, Branding

Ontario Appliance Service | Freelance Client Website

Since 2026

melodic-squirrel-b72843.netlify.app

- Developed a responsive service website for a freelance client in the appliance repair business.
- Enabled users to view the full service catalogue and submit enquiries efficiently through the site.

Stack: Next.js, React, Tailwind CSS, Responsive Design, Freelance

INTERNSHIPS

Motion Cut | Python Programming Intern

Jan 2025 — Apr 2025

Remote

- Developed and contributed to project-based tasks throughout a structured Python internship programme.
- Applied data structures, algorithms and OOP concepts to practical problem statements rather than textbook exercises.

Coding Raja Technology | Machine Learning Intern

Jan 2024 — Mar 2024

Remote

- Developed a machine-learning based dashboard to analyse datasets and surface insights that supported clearer decision-making.
- Tuned and evaluated models with an eye on both accuracy and scalability of the resulting system.
